What's New in Argos 5.2.1?

Evisions is pleased to announce the release of Argos version 5.2.1, which resolves the following three issues:

- Clicking the "Test" button in the DataBlock designer on systems at 125% DPI caused an "Argument out of Range" error.
- Special characters used in the body of scheduled emails were displaying as question marks.
- Scheduled PDF reports would use incorrect font embedding settings if the report was run manually using different settings.

We appreciate the feedback received from all of our users. Our products would not be what they are today without your continued support. If you have any comments or suggestions, please do not hesitate to [open a HelpDesk ticket](#) and let us know.

Argos Updates

This release includes updates to the Argos mapplet and Argos client. There are no corresponding updates to MAPS.

Product versions

The latest versions of Argos included in this release are:

- Argos mapplet 5.2.1.1155 / Argos client 5.2.1.1593

Installation

1. Prepare test environment and ensure current backup

We highly recommend installing updates in a test environment before applying them to your production environment. You should make sure that a current backup is available in case of any unforeseen issues. To create a full backup of your MAPS environment, go to the **Server** -> **Backups** screen in MAPS and click **Backup Now**.

2. Check for updates

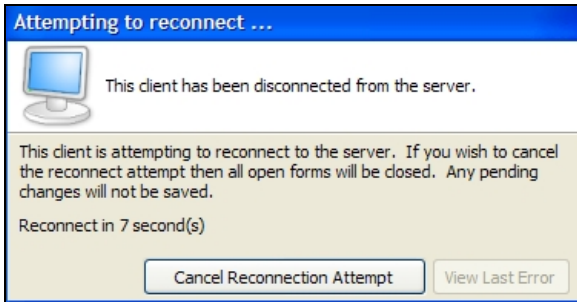

Click the **Check for Updates** button in the MAPS Configuration tool to view available updates.

If you are not already running Argos and MAPS 4.x, please refer to the [Argos 4.0 Release Guide](#) for instructions prior to proceeding with this upgrade.

It is possible to apply updates when users are on the system; however, to avoid the possibility of losing unsaved work we recommend applying updates during off hours.

[3. Allow update process to complete](#)

When applying updates to the MAPS service you will be temporarily disconnected from the server:

The update process may take a few minutes to complete. **Do NOT cancel the reconnection attempt or manually restart the server.** You will automatically be reconnected to the server once the update has been applied.

[4. Verify the latest version is installed](#)

To ensure that you are on the most current version, continue clicking the **Check for Updates** button and applying the updates until no new updates are available.

Please Provide Us with Your Feedback!

As always, we welcome any [feedback or suggestions](#) you may have. We very much appreciate your thoughts and suggestions, so please keep the great ideas coming!

Argos 5.2.1 Release Notes

Argos Mapplet 5.2.1.1155 / Argos Client 5.2.1.1593

Argos

[Resolved Issues](#)

Area	Description	Issue number
DataBlocks	In Argos 5.2, clicking the "Test" button in the DataBlock designer on a system set to 125% DPI resulted in an "Argument out of Range" error.	AR-4515
Localization	Special characters, including Arabic letters and other special characters used in languages other than English that appeared in the body of scheduled emails were displaying as question marks instead of as the intended characters.	AR-3996
Scheduling	Font embedding for scheduled PDF reports was using the option the user chose last time they ran the report from the dashboard instead of the option that was specified for the schedule.	AR-4534

Getting Help

For information on using the software, please refer to the in-product Help, which contains detailed information on all aspects of the product.

If you are having problems with the installation or configuration, you can search our knowledge base of common issues and their resolutions at <http://helpdesk.evisions.com>. If you are unable to find the solution, submit a HelpDesk request with a detailed explanation of the problem you are experiencing.

Please do not hesitate to contact the Evisions HelpDesk if any questions or problems arise. We are here to help you and want to ensure your success.

If you find that areas of this documentation could benefit from additional detail or clarification, please let us know. We are constantly trying to improve the installation process to make it as easy as possible.
