# What's New in Argos 6.6.2?

---

Evisions is pleased to announce the release of Argos version 6.6.2, which includes the following changes:

## Argos Enhancements:

- Long-running reports in the Argos Web Viewer can now be canceled.

## Argos Resolved Issues:

- Scheduled Crosstab reports were always printing as duplex, regardless of duplex settings.
- Certain queries were unable to join tables via text in the Visual Designer.
- Fixes to background images that were failing to load or display correctly.

## MAPS Enhancements:

- Added the Run Direct Query operation for users who intend to execute queries from non-MAPS applications.
- Updated support for Chrome cookies.
- Various eLauncher accessibility improvements.

## MAPS Resolved Issues:

- Deadlock errors were occurring when actions audited by MAPS were being performed during Data Warehouse migrations.
- Additional improvements.

We appreciate the feedback received from all of our users. Our products would not be what they are today without your continued support. If you have any comments or suggestions, please do not hesitate to [open a HelpDesk ticket](#) and let us know.

## MAPS and Argos Updates

---

Some of the changes in this release require an update to MAPS as well as to Argos. We recommend upgrading both products to the latest versions concurrently.

### Product versions

The latest versions of MAPS and Argos included in this release are:

- Argos mapplet 6.6.2.0.1988 / Argos client 6.6.2.0.2329 / Web Viewer 6.6.2.7
- MAPS service 6.6.2.2407 / MAPS Config 6.6.2.1336 / eLauncher 6.6.2.2

## Installation

---

### 1. Prepare test environment and ensure current backup

We highly recommend installing updates in a test environment before applying them to your production environment. You should make sure that a current backup is available in case of any unforeseen issues. To create a full backup of your MAPS environment, go to the **Server** -> **Backups** screen in MAPS and click **Backup Now**.

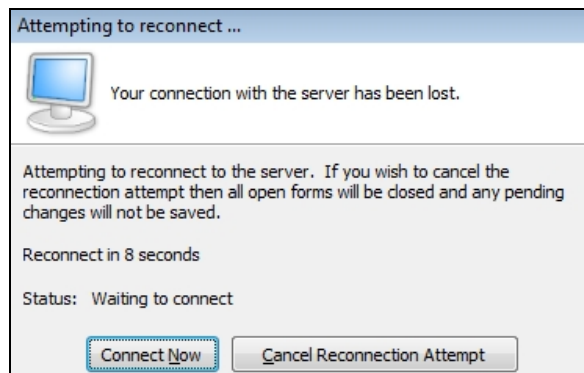

### 2. Check for updates

Click the **Check for Updates** button in the MAPS Config application to view available updates.

It is possible to apply updates when users are on the system; however, to avoid the possibility of losing unsaved work we recommend applying updates during off hours.

### 3. Allow update process to complete

When applying updates to the MAPS service you will be temporarily disconnected from the server:

The update process may take a few minutes to complete. **Do NOT cancel the reconnection attempt or manually restart the server.** You will automatically be reconnected to the server once the update has been applied.

### 4. Verify the latest version is installed

To ensure that you are on the most current version, continue clicking the **Check for Updates** button and applying the updates until no new updates are available.

## Please Provide Us with Your Feedback!

As always, we welcome any [feedback or suggestions](#) you may have. We very much appreciate your thoughts and suggestions, so please keep the great ideas coming!

# Argos 6.6.2 Release Notes

---

Argos Mapplet 6.6.2.1988 / Argos Client 6.6.2.2329 / Web Viewer 6.6.2.7  
MAPS Service 6.6.2.2407 / MAPS Config 6.6.2.1336 / eLauncher 6.6.2.2

## Argos

---

### Enhancements

User Interface	Dashboards being launched from the Argos client were experiencing undesired flickering when initializing.	AR-6158
Visual Designer	Queries written with ANSI syntax were unable to join tables via text in the Visual Designer.	AR-1810

## Enhancements

Area	Description	Issue number
Accessibility	Increased the contrast of the text for session expiry warnings in the eLauncher.	MAPS-1421
Accessibility	The lock and database lock icons on the Change Password dialog box in the eLauncher were missing alt text.	MAPS-1414
Accessibility	The leaves icons in the eLauncher now have transparent backgrounds for improved visibility when viewing in high contrast mode.	MAPS-1312
Accessibility	Settings and Sign Out buttons in the eLauncher can now be focused and reached by tabbing.	MAPS-2471
eLauncher	Updated support for Chrome cookies.	MAPS-2743
Help	Added auditing actions and descriptions to the Web Help.	MAPS-2459
Integration	Added the Run Direct Query operation for users who intend to execute queries from non-MAPS applications.	MAPS-2815

## Resolved Issues

Area	Description	Issue number
Help	Opening the Web Help via the F1 key in the Driver's section of the MAPS Configuration Tool was taking users to an incorrect URL.	MAPS-2776
Log Files	Deadlock errors were occurring when actions audited by MAPS were being performed during Data Warehouse migrations.	MAPS-2531

# Getting Help

---

For information on using the software, please refer to the in-product Help, which contains detailed information on all aspects of the product.

If you are having problems with the installation or configuration, you can search our [support site](#), which includes a knowledge base of common issues. If you are unable to find the solution, submit a HelpDesk request with a detailed explanation of the problem you are experiencing.

Please do not hesitate to contact the Evisions HelpDesk if any questions or problems arise. We are here to help you and want to ensure your success.

If you find that areas of this documentation could benefit from additional detail or clarification, please let us know. We are constantly trying to improve the installation process to make it as easy as possible.
