What's New in MAPS 6.9.2?

Evisions is pleased to announce the release of MAPS version 6.9.2, which includes the following changes:

- MAPS Administrators can now require users to log in using SSO.

- System variables were sometimes blank when running multiple instances of the same DataBlock.

- Prevented data connections from timing out while a database transaction is still active.

- Resolved an issue in IntelleCheck where batches were sometimes not marked as processed after transmitting BankMobile payments.

We appreciate the feedback received from all of our users. Our products would not be what they are today without your continued support. If you have any comments or suggestions, please do not hesitate to open a case with the HelpDesk and let us know.

MAPS Updates

MAPS 6.9.2 is an update to the MAPS service and MAPS Config. You should upgrade both components concurrently.

Product versions

The latest versions of MAPS included in this release are:

- MAPS service 6.9.2.2612 / MAPS Config 6.9.2.1461

Installation

1. Prepare test environment and ensure current backup

We highly recommend installing updates in a test environment before applying them to your production environment. You should make sure that a current backup is available in case of any unforeseen issues. To create a full backup of your MAPS environment, go to the **Server** -> **Backups** screen in MAPS and click **Backup Now**.

### 2. Check for updates

Click the **Check for Updates** button in MAPS Config to view available updates.

> If you need to apply updates prior to the 6.9.2 update, please refer to the appropriate release guide(s) before proceeding.

It is possible to apply updates when users are on the system; however, to avoid the possibility of losing unsaved work we recommend applying updates during off hours.

3. Allow update process to complete

When applying updates to the MAPS service you will be temporarily disconnected from the server:

The update process may take a few minutes to complete. **Do NOT cancel the reconnection attempt or manually restart the server.** You will automatically be reconnected to the server once the update has been applied.

4. Verify the latest version is installed

To ensure that you are on the most current version, continue clicking the **Check for Updates** button and applying the updates until no new updates are available.

Please Provide Us with Your Feedback!

As always, we welcome any feedback or suggestions you may have. We very much appreciate your thoughts and suggestions, so please keep the great ideas coming!

MAPS 6.9.2 Release Notes

MAPS Service 6.9.2.2612 / MAPS Config 6.9.2.1461

MAPS

Enhancements

Area	Description	Issue number
SSO	Added an Advanced Settings tab under Single Sign-On which contains the options to restrict local MAPS and LDAP user logins, and create lists of groups to be excluded from this restriction.	MAPS-3412

Resolved Issues

Area	Description	Issue Number
BankMobile	BankMobile refund files that were generated and sent were occasionally failing to appear as processed in IntelleCheck.	MAPS-3421
DataBlocks	DataBlock System Variables were occasionally producing blank values when multiple instances of that DataBlock were run at the same time.	MAPS-3420
Data Connections	Active data connections were experiencing an idle timeout while transactions or updates were taking place.	MAPS-3397
Data Connections	System variable values were coming back as null when a DataBlock with an active connection was re-run after being closed due to an idle timeout.	MAPS-3398

Getting Help

For information on using the software, please refer to the product Help, which contains detailed information on all aspects of the product.

If you are having problems with the installation or configuration, you can search our [support site](), which includes a knowledge base of common issues. If you are unable to find the solution, submit a HelpDesk request with a detailed explanation of the problem you are experiencing.

Please do not hesitate to contact the Evisions HelpDesk if any questions or problems arise. We are here to help you and want to ensure your success.

Can't find what you're looking for?

We would love to make our documentation better! If you have a moment to let us know what we missed or how we can make the help more useful, please email us at TechDocs@evisions.com.
